General Description

Recognized by ACTFL as a foreign language taught in K-12 and higher learning education, American Sign Language (ASL) is used prevalently in the Deaf community. While ASL is one of the five most studied foreign languages in the United States, the field of study is rapidly growing in research, cross-cultural studies, teaching, and interpreting.

ASL is a visual language embedded with rich cultural beliefs, systems, and heritage. This program offers students a rich opportunity to learn ASL and prepare for transfer to a four-year institution. These language and culture courses scaffold students' learning experience and heightened awareness to communicate effectively and interact appropriately in the community—the program focus on building sign language competency in an entry-level scope.
